

Proposed changes on Valyntin Consulting, LLC

The following are some of the notable sections or elements that need to be improved on:

1. The company logo is not visible – needs to be enlarged both for desktop and mobile version
2. The website needs to be made responsive for smaller devices. The layout overflows on smaller devices.
3. Buttons need to be resized both on desktop and mobile platform – make the buttons to be a bit smaller.
4. **Visit site** button on mobile version website not working. Recommended rename it to close to close the popup or remove it completely.
5. Black color is too much makes the website look too dull. Make the website more catchy by using brighter colors.
6. Some of partner logo images on the partners section are too much distorted. Recommended use better quality images or avoid using the sliding section and instead have static images which are smaller in size.
7. The section just below partners is not labelled. Ensure it's labelled to bring out meaning. Also, use company logos instead of the provided icon above.
8. The mission paragraph the font size and font family not looking good. Use different font type and size.
9. White text on top of the images under news not clearly visible. Use different color or provide a background color.
10. News section should be a page by itself and a link added on the navigation bar for easy access.
11. Dr. Daisy Valentin's photo too tiny. Enlarge the image to look better.
12. Let all the heading and section titles to be in UPPERCASE and the rest of the text to be in Sentence case.
